Open Seating

80 YEARS

AGC Silent Samaritan Award will be presented at this event!

Guest Speaker: Heather "Lucky" Penney

Heather is widely recognized for her service on September 11, 2001, when she was one of two fighter pilots sent, in armed jets, to intercept Flight 93 before it reached its target in Washington, D.C. In a stoic act of bravery, Heather went on a kamikaze mission ready to use her jet as her only weapon to take down the hijacked plane.

Heather grew up around aviation and warbirds and always loved to fly. While earning her Master of Arts at Purdue University, she learned Congress had opened combat aviation to women. She applied to the Air National Guard where she became one of the first generation of female fighter pilots in the country and was the first and only woman in the 121st Fighter Squadron.

Please join us to hear Heather's heroic and inspirational story.

AGC Presents:

Construction Quality Management (CQM) Course

8:00 a.m.—4:00 p.m.

Thursday, April 4, 2019 & Friday, April 5, 2019

AGC Building, 5400 Mill Street

(775) 329-6116

Members: $375 Non-Members: $425

The Construction Quality Management (CQM) course is the result of the U.S. Army Corps of Engineers and NAVFAC partnering with AGC and others to develop a consistent training and set the standards to be used in quality control. Not only will this course define what Construction Quality Management is, it teaches the difference between Control vs Inspection, and defines the responsibilities of contractor personnel engaged in CQC and government personnel engaged in QA.

Contractor Bulletin for Inertial Profiler Certification

Per Subsection 402.03.03 of the NDOT Standard Specifications for Road and Bridge Construction, operators and their corresponding equipment must be certified according to the requirements of AASHTO R56 or other equivalent Department accepted certification program in order to perform pavement smoothness measurements for project acceptance on NDOT contracts.

NDOT will be offering two separate certification sessions that will take place on May 1st or 2nd, in Las Vegas, and May 15th, or 16th, in Carson City. The certification will be required for operators, and their equipment, who will be potentially measuring pavement smoothness for acceptance on NDOT contracts. The certification will consist of a 25 question written exam and a performance verification. The 25 question written exam will test the participants knowledge of AASHTO M328, R56, R57, and NDOT specifications. The performance verification will test the operator on knowledge of setup, calibration and operation of inertial profilers which will include the accuracy and repeatability of the results as it compares to a pre-established reference profile.

Successful completion of the written examination will be required once every 5 years. The performance verification for the operator and the corresponding equipment will have an expiration of one year. A database of all participants and their equipment certified in the program will be kept on file for verification prior to performing pavement smoothness on NDOT contracts.

This certification program is **FREE** to all participants. The certification sessions will begin at each location at 8:00 a.m. We will meet at the following address and then travel to the certification site:

Las Vegas

123 East Washington Avenue (Building Q)
Las Vegas, Nevada 89101

Carson City

1253 Oregon Street (Conference Room B)
Carson City, Nevada 89712

Please note that CalTrans has now accepted NDOT's certification program. Due to this reciprocity, **recertification** will be our first priority. If you have new operators, we will schedule accordingly as there will be a cap on the number of attendees.

Please contact Justin Sweetland at (775) 888-7117 or email him at jsweetland@dot.nv.gov no later than **Friday, April 12th, 2019** to register. He will need your name, company name, phone number, email address, and the preferred day that you would like to attend. Every effort will be made to accommodate your schedule. However, NDOT reserves the right to make adjustments as needed.

AGC Professional Development for Women with Liz Goodgold!

Can't make it to every session? No problem – now you can pick and choose which individual sessions you would like to attend.

RSVP by 10:00 a.m. Wednesday prior to the session(s) of your choice to reserve your spot!

Academy for Career Education

CAREER FAIR

WHEN
April 16, 2019
6 - 7:30 pm

WHERE
ACE HIGH SCHOOL
2800 Vassar Street, Reno 89502

Please join us for an evening of networking with future employees!

We are a tuition free public charter school. We offer four CTE programs; Building Trades, Computer Aided Drafting and Design, Diesel Mechanics, and Advanced Machining and Manufacturing. The majority of our students plan on entering the work force or military right out of high school, and we also have a small group who plan on attending college. Our senior class is around 50 students, and we encourage any of our interested juniors to attend as well.

RSVP: KJONAS@ACEHIGHSCHOOL.ORG

ACE STUDENTS

- are OSHA 10 Certified
- earn college credits and certificates while in high school
- are graded on employability skills
- participate in the state and National SkillsUSA competitions

PLEASE RSVP EARLY

This is a great opportunity to meet and interact with potential employees.
